SAFETY FAST!

"I find that the more we motor the more we are apt, unconsciously, to demand higher standards. We become connoisseurs, and then it isn't so much a matter of *what* a car will do as the *way* it does it. Lots of cars today, taxed to their uttermost, their engines protesting, their drivers tense, will do their seventy or even eighty miles an hour. Only a favoured few will combine with that high performance the polished ease and safety that make for restful motoring.

Need I add that M.G. Cars are in that select company."
